PRICE: $50

MAY 18, 2005

106-02907/

INTRODUCTION:

The Manitoba Bureau of Statistics (MBS) has prepared this report as part of its economic statistics program. The purpose is to provide information for Manitoba on the importance and impact of international merchandise trade.

This publication provides merchandise export and import statistics by country, country grouping, commodity and industry. The information is from Statistics Canada's International Trade Division.

MBS adjusts the value of exports for some commodities in its Manitoba Economic Accounts. These adjustments are undertaken to better reflect the value of the foreign export of these commodities to the provincial economy.

Users should be aware that the export data is on a "province of origin" basis, while the import data is on a "province of clearance" basis. Therefore, imports from other countries are not counted if they are cleared through custom ports in other provinces and then shipped to Manitoba (MBS would count these as interprovincial imports). This implies that the trade balances calculated for individual countries could overstate Manitoba's actual position.

All commodity data presented in this report are based on the 4-digit level Harmonized System (HS).

The Manitoba Bureau of Statistics has available additional detailed information, which can be supplied to interested users on a cost recovery basis. Export/Import information that can be provided includes:

i) individual commodities for specific countries
ii) individual commodities by country (volume and dollar value) at the 4, 6, 8, or 10 digit HS level
iii) commodities by country for specific industries or sectors.

For answers or further information, please contact Marcel Chartier at (204) 945-2991.

NOTE TO USERS:

The data presented in this report has been derived from the most current estimates released by Statistics Canada's International Trade Division: revisions to the 2004 calendar year have been incorporated in this report. For the 2001, 2002 and 2003 calendar years, MBS has made a reduction of $534.0, $1,195.4 and $302.9 million respectively to aircraft imports from France to better reflect Manitoba's true share of these imports that are used throughout Canada.

This report includes four historical tables (Tables 11(a & b) and 12(a & b)). They provide the current export data by selected country and industry for the years 2001 to 2004.

It is to be noted that revisions to previous year's data (2004) now occur on a quarterly basis. This results in an increase of $21.7 million between the current and the previous estimates of total export numbers for the 2004 calendar year.

This report uses the redefined Economic Union (EU) comprised of 25 countries as of May 2004. Endnote 2 has a listing of these EU countries.

MANITOBA TRADE UPDATE

SECOND QUARTER, 2005

MANITOBA
BUREAU OF STATISTICS

RIGHT ANSWERS
RIGHT NOW

MBS 3A8

PRICE: $50.00

AUGUST 23, 2005

INTRODUCTION:

The Manitoba Bureau of Statistics (MBS) has prepared this report as part of its economic statistics program. The purpose is to provide information for Manitoba on the importance and impact of international merchandise trade.

This publication provides merchandise export and import statistics by country, country grouping, commodity and industry. The information is from Statistics Canada's International Trade Division.

MBS adjusts the value of exports for some commodities in its Manitoba Economic Accounts. These adjustments are undertaken to better reflect the value of the foreign export of these commodities to the provincial economy.

Users should be aware that the export data is on a "province of origin" basis, while the import data is on a "province of clearance" basis. Therefore, imports from other countries are not counted if they are cleared through custom ports in other provinces and then shipped to Manitoba (MBS would count these as interprovincial imports). This implies that the trade balances calculated for individual countries could overstate Manitoba's actual position.

All commodity data presented in this report are based on the 4-digit level Harmonized System (HS).

The Manitoba Bureau of Statistics has available additional detailed information, which can be supplied to interested users on a cost recovery basis. Export/Import information that can be provided includes:

i) individual commodities for specific countries
ii) individual commodities by country (volume and dollar value) at the 4, 6, 8, or 10 digit HS level
iii) commodities by country for specific industries or sectors.

For answers or further information, please contact Marcel Chartier at (204) 945-2991.

NOTE TO USERS:

The data presented in this report has been derived from the most current estimates released by Statistics Canada's International Trade Division: revisions to the 2004 calendar year have been incorporated in this report. For the 2001, 2002 and 2003 calendar years, MBS has made a reduction of $534.0, $1,195.4 and $302.9 million respectively to aircraft imports from France to better reflect Manitoba's true share of these imports that are used throughout Canada. Also, $49.6 million of the exports to Jordan during the second quarter, 2005 are reported to be aircraft exports.

This report includes four historical tables (Tables 11(a & b) and 12(a & b)). They provide the current export data by selected country and industry for the years 2001 to 2004.

It is to be noted that revisions to previous year's data (2004) now occur on a quarterly basis. This results in a decrease of $1.2 million between the current and the previous estimates of total export numbers for the 2004 calendar year.

This report uses the redefined Economic Union (EU) comprised of 25 countries as of May 2004. Endnote 2 has a listing of these EU countries.

MANITOBA TRADE UPDATE

THIRD QUARTER, 2005

MANITOBA
BUREAU OF STATISTICS

RIGHT ANSWERS
RIGHT NOW

MBS 3A8

PRICE: $50.00

NOVEMBER 21, 2005

INTRODUCTION:

The Manitoba Bureau of Statistics (MBS) has prepared this report as part of its economic statistics program. The purpose is to provide information for Manitoba on the importance and impact of international merchandise trade.

This publication provides merchandise export and import statistics by country, country grouping, commodity and industry. The information is from Statistics Canada's International Trade Division.

MBS adjusts the value of exports for some commodities in its Manitoba Economic Accounts. These adjustments are undertaken to better reflect the value of the foreign export of these commodities to the provincial economy.

Users should be aware that the export data is on a "province of origin" basis, while the import data is on a "province of clearance" basis. Therefore, imports from other countries are not counted if they are cleared through custom ports in other provinces and then shipped to Manitoba (MBS would count these as interprovincial imports). This implies that the trade balances calculated for individual countries could overstate Manitoba's actual position.

All commodity data presented in this report are based on the 4-digit level Harmonized System (HS).

The Manitoba Bureau of Statistics has available additional detailed information, which can be supplied to interested users on a cost recovery basis. Export/Import information that can be provided includes:

i)individual commodities for specific countries
ii)individual commodities by country (volume and dollar value) at the 4, 6, 8, or 10 digit HS level
iii)commodities by country for specific industries or sectors.

For answers or further information, please contact Marcel Chartier at (204) 945-2991.

NOTE TO USERS:

The data presented in this report has been derived from the most current estimates released by Statistics Canada's International Trade Division: revisions to the 2004 calendar year have been incorporated in this report. For the 2001, 2002 and 2003 calendar years, MBS has made a reduction of $534.0, $1,195.4 and $302.9 million respectively to aircraft imports from France to better reflect Manitoba's true share of these imports that are used throughout Canada. Also, $49.6 million of the exports to Jordan during the second quarter, 2005 are reported to be aircraft exports.

This report includes four historical tables (Tables 11(a & b) and 12(a & b)). They provide the current export data by selected country and industry for the years 2001 to 2004.

It is to be noted that revisions to previous year's data (2004) now occur on a quarterly basis. This results in a decrease of $332 million between the current and the previous estimates of total export numbers for the 2004 calendar year. The major commodities affected by the revisions are cereal grains and oilseeds.

MANITOBA TRADE UPDATE

FOURTH QUARTER, 2005

MANITOBA
BUREAU OF STATISTICS

RIGHT ANSWERS
RIGHT NOW

MBS 3A8

PRICE: $50.00

FEBRUARY 21, 2006

INTRODUCTION:

The Manitoba Bureau of Statistics (MBS) has prepared this report as part of its economic statistics program. The purpose is to provide information for Manitoba on the importance and impact of international merchandise trade.

This publication provides merchandise export and import statistics by country, country grouping, commodity and industry. The information is from Statistics Canada's International Trade Division.

MBS adjusts the value of exports for some commodities in its Manitoba Economic Accounts. These adjustments are undertaken to better reflect the value of the foreign export of these commodities to the provincial economy.

Users should be aware that the export data is on a "province of origin" basis, while the import data is on a "province of clearance" basis. Therefore, imports from other countries are not counted if they are cleared through custom ports in other provinces and then shipped to Manitoba (MBS would count these as interprovincial imports). This implies that the trade balances calculated for individual countries could overstate Manitoba's actual position.

All commodity data presented in this report are based on the 4-digit level Harmonized System (HS).

The Manitoba Bureau of Statistics has available additional detailed information, which can be supplied to interested users on a cost recovery basis. Export/Import information that can be provided includes:

i)individual commodities for specific countries
ii)individual commodities by country (volume and dollar value) at the 4, 6, 8, or 10 digit HS level
iii)commodities by country for specific industries or sectors.

For answers or further information, please contact Marcel Chartier at (204) 945-2991.

NOTE TO USERS:

The data presented in this report has been derived from the most current estimates released by Statistics Canada's International Trade Division: revisions to the 2002, 2003 and 2004 calendar years have been incorporated in this report.

For the 2002 and 2003 calendar years, MBS has made a reduction of $1,195.4 and $302.9 million respectively to aircraft imports from France to better reflect Manitoba's true share of these imports that are used throughout Canada. For 2003, Manitoba's exports have been revised up by $29.5 million: most of this change occurs in the "rape, colza or mustard oil" commodity. Also, $49.6 million of the exports to Jordan during the second quarter, 2005 are reported to be aircraft exports.

This report includes four historical tables (Tables 11(a & b) and 12(a & b)). They provide the current export data by selected country and industry for the years 2002 to 2005.
